## INTRACEUTICALS OXYGEN INFUSION.

Oxygen treatments are the latest skin care advancement for hydration and age control producing immediate, visible results with non-invasive techniques. Due to the regenerative properties of oxygen, physicians, dermatologists and plastic surgeons all agree that oxygen is essential for healing and treating certain skin conditions. Your skin provides a natural barrier to the environment thus absorbing the damaging effects of pollution. Because environmental pollution deprives our skin of pure oxygen we see an increase of stressed and pre-maturely aged skin resulting in fine lines and wrinkles with lack of firmness and elasticity.
