

ALL THAT'S NEW AT SADDLEBROOK

We have undergone and continue with a significant transformation of the property.

- The recently completed renovations of our meeting space includes new ceramic flooring on both Pegasus and Royal Palm foyers and new carpet in both Ballrooms and all Board Rooms. New colorful artwork on the newly duralast textured walls and new LED lighting enhances the fresh color scheme and complements our beautiful new look.
- Upgraded and increased bandwidth throughout the resort (1G), including increased bandwidth in meeting rooms, public spaces and complimentary in-room Wi-Fi. This also allows us to dedicate and skew bandwidth to specific locations based on traffic flow.
- Pool deck enlarged by over 5,000 square feet allowing additional space for outdoor events.
- Currently renovating our Guest Rooms to include a brighter and fresher look. The ceilings and walls are getting a textured look (removing wallpaper and popcorn ceilings), new carpet, and upgrading to all LED lighting.
